Khaveer Narsai

Good thank you just talk through what you're doing and what you're thinking as well.

Milad

 What would you like to recycle today. I am going to recycle aluminium can

because it's gonna be probably what I have at lunch. Is the can empty? Yes. Separate the items and put them in bin. put in bin. what is it'?

Khaveer Narsai

its just bin four

Milad

Bin four

Khaveer Narsai

so when you're on that screen there its showing you that you now have a can, and now it takes you to put in the bun here

Milad

okay got you finished?

Khaveer Narsai

lets say more stuff to recycle

lets do a bottle I think yeah

Milad

Is the bottle clean? technically?

Khaveer Narsai

so when I say clean it really means just like empty

Milad

I mean like washing the bottle or something like that. Glass? Seperate the items and put them into bin bottle lid. Bottle.

Khaveer Narsai

So, okay so yo are tapping at the items on the screen Why do you think is tapping on the items? Like what what's the reason that you wanted to go tap on the bottle on the screen?

Milad

Things I thought I'd have to choose that.

Khaveer Narsai

 okay.

Milad

So it's just like to be bin three anyway.

Khaveer Narsai

It Separated out into those items.

Milad

Okay got you.

Khaveer Narsai

be separated out into two different bins does that make sense.

Milad

Yeah why is there. why is there like too many different bins because it's so confusing when I get home.

Khaveer Narsai

Yeah, that makes sense. Why do you think that is? Is it because you only have two bins at home? Like you don't really have five different choices.

Milad

I only have two bins at home yes

Khaveer Narsai

okay, so you want to make it easier to understand how to separate it into your own being?

Milad

Yep.

Khaveer Narsai

Cool. Yeah, keep clicking. And then have a look around. So if you're done with recycling and you want to go into something new,

Milad

cool let me see somthing.

with foodwaste, take away containers.

Take away Containers

Yeah, I mean ussually it would be dirty.

bin three bin two lid okay got you. So it's just done finished.

Khaveer Narsai

So say finish now.

So now you can do one of two things here so you can other

Milad

View the tree was just like, play a game.

okay, what is this? (gesturing to the "view the tree)

Khaveer Narsai

The one I've done? Yeah. So it shows you your leaves getting added into the tree.

Milad

Got you.

Khaveer Narsai

Man, the game there is just like, sort of like a trivia game. So it's like hang man, but you can play to get a fact about recycling.

Do you think you would use either like functions

Milad

yeah maybe why not that seems cool.
